## Start the conversation:

It's a conversation that starts with you.

✓ **Set expectations:** pain is a normal part of the healing process.

✓ **Create a pain management plan** with your patient.

✓ **Prescribe the lowest dose** for the shortest amount of time.

✓ **Talk about safe use** of opioids and the importance of following a prescription.

✓ **Urge patients to lock up** their medication.

✓ **Direct patients to** [MedTakeBackWashington.org](http://MedTakeBackWashington.org)

when they no longer need

their medications.
