Talk to your patients about responsible opioid use.

Start the conversation:

- ✓ **Set expectations:** pain is a normal part of the healing process.
- ✓ **Create a pain management plan** with your patient.
- ✓ **Prescribe the lowest dose** for the shortest amount of time.
- ✓ **Talk about safe use** of opioids and the importance of following a prescription.
- ✓ **Urge patients to lock up** their medication.
- ✓ **Direct patients to** **MedTakeBackWashington.org** when they no longer need their medications.
